Quantified STF Fund (QSTFX) was rated against the following numbers of U.S. Tactical Allocation funds over the following time periods: 229 funds overall, 229 funds in the last three years, and 205 funds in the last five years. With respect to these Tactical Allocation funds, Quantified STF Fund received a 4 star rating overall, 3 stars for three years and 4 stars for five years.

INVESTMENT OBJECTIVE

The Fund seeks high appreciation on an annual basis consistent with a high tolerance for risk.

ABOUT THE FUND

The Quantified STF Fund follows easily identifiable trends in the market, with rule sets that seek to take advantage of both up and down trends. Since investments are based solely on the price action of the NASDAQ 100, the strategy seeks to outperform that Index over a complete bull/bear market cycle with less downside risk.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.
